Symptom (public)

This is a log of updates on the resources for the MSFD art 13/14 reporting:

2015-06-20:

- The webforms will automatically update Measure codes and Exceptions codes when the region is changed.
- All fields are made mandatory.
- Exceptions code uses two digits for the serial number

2015-10-01:

- The webform will match the environmental targets when the region is changed
- Multiple links to existing policies can be selected
- KTM list updated
- Link to existing policies list updated
- Environmental targets list updated

2015-10-20

- Links to all measures and exceptions has been removed
- Guidance text updated
- Link to existing policies list updated with IMO sub categories
- No_specific_target_addressed added to all target lists
- rgb-code list was missing for UK
